Cleveland State University's Natatorium acquires Colorado Time Systems' full color video display

Cleveland State University unveiled its new Colorado Time Systems' video display at the Robert F. Busbey Natatorium as Cleveland State started their swimming and diving season at home against Green Bay. The project has been in the making for several years in an effort to provide the University the opportunity to host elite events at the facility.

The video display was funded by private donors and alumni. The installation marks the completion of the first phase in a series of upgrades. The natatorium now boasts a 23mm full color LED matrix display that measures approximately 11ft x 19 ft (3.3m x 5.9m). The display is capable of displaying live timing and results, animations, full color live video, and video replays. In addition to the display, the University acquired a System 6 Timing Console, which includes timing and scoring for swimming, diving, water polo, and synchronized swimming.

"It has been a goal of CSU for the last several years to have a quality top of the line display board for the world class Robert F. Busbey Natatorium on the campus of Cleveland State University," Director of Competitive Aquatics Wally Morton said. "Our new Colorado Time Systems' board, donated by our alumni, was unveiled at the Alumni Meet weekend as the Vikings started our home season against Green Bay. The board is getting rave reviews. The clarity, resolution and innovative designs along with video replay are fantastic. The board exceeds our expectations and we look forward to maximizing its use for many years to come. Hosting top level regional, national and international meets with this added dimension to our facility will continue to be part of our operation."

"We were honored to work with Cleveland State University and provide video and timing equipment for this state-of-the-art facility," said Colorado Time Systems' Eastern Sales Manager Mark Polansky. "We are committed to the aquatics market and to the aquatics programs at Cleveland State University, and we will remain focused on providing quality products and services."

Based in Loveland, Colorado, Colorado Time Systems has established a reputation for precision and innovation in swim timing, scoring, and display equipment. Since 1972, premier aquatic facilities have chosen Colorado Time Systems for platinum quality timing, scoring, and display systems.
